Apex Test class

The screenshot displays the Salesforce IDE interface. The main editor shows the source code for the `QuoteLineItemTriggerTest` class. The code includes a `@isTest` annotation, a `public class` declaration, and a `@testSetup` method. The `setupTestData` method contains logic to create an `Account`, an `Opportunity`, and a `Quote` with specific test data. The `Quote` is created with a name, opportunity ID, email address, status, and pricebook ID.

```
1 @isTest
2 public class QuoteLineItemTriggerTest {
3
4     @testSetup
5     static void setupTestData() {
6         // Create an Account
7         Account account = new Account(Name = 'Test Account');
8         insert account;
9
10        // Create an Opportunity
11        Opportunity opportunity = new Opportunity(
12            Name = 'Test Opportunity',
13            StageName = 'Closed Won',
14            CloseDate = Date.today(),
15            AccountId = account.Id
16        );
17        insert opportunity;
18
19        Id priceBookID = Test.getStandardPricebookId();
20
21        // Create a Quote with an Email address
22        Quote quote = new Quote(
23            Name = 'Test Quote',
24            OpportunityId = opportunity.Id,
25            Email = 'test@example.com',
26            Status = 'Draft',
27            Pricebook2Id = priceBookID
28        );
29    }
```

Below the code editor, the **Tests** tab is active, showing a table of test run results. The table includes columns for Status, Test Run, Enqueued Time, Duration, Failures, and Total. The results show that the test class passed all test runs.

Status	Test Run	Enqueued Time	Duration	Failures	Total
✗	TestRun @ 2:46:12 pm			1	1
✗	TestRun @ 2:50:02 pm			1	1
✗	TestRun @ 2:50:25 pm			1	1
✓	TestRun @ 2:50:41 pm			0	1
✓	TestRun @ 2:51:43 pm			0	1
✓	TestRun @ 6:03:41 pm			0	1
✓	TestRun @ 6:07:16 pm			0	1

On the right side, the **Overall Code Coverage** panel is visible. It shows the overall code coverage for the test class, with a total of 93% coverage across 35 lines of code. The coverage is broken down by class, with `generateQuotePdfDocument` at 92% and `QuoteLineItemTrigger` at 100%.

Class	Percent	Lines
Overall	93%	
generateQuotePdfDocument	92%	35/38
QuoteLineItemTrigger	100%	6/6
